Fastrack Auto Batch Scan Documents Improves Productivity

Plainview, NY...Fastrack Healthcare Systems, Inc. announced today the availability of new functionality that will dramatically reduce the time needed to input documents into their Document Manager, a system that is designed to help providers go paperless.

Utilizing the Fastrack Forms Designer, providers can now add a bar code to virtually any form. The bar code includes all the relevant information needed to know where to locate the form within the Fastrack System such that a CMN would be attached to a specific patient record behind a pre-defined tab called CMNs.

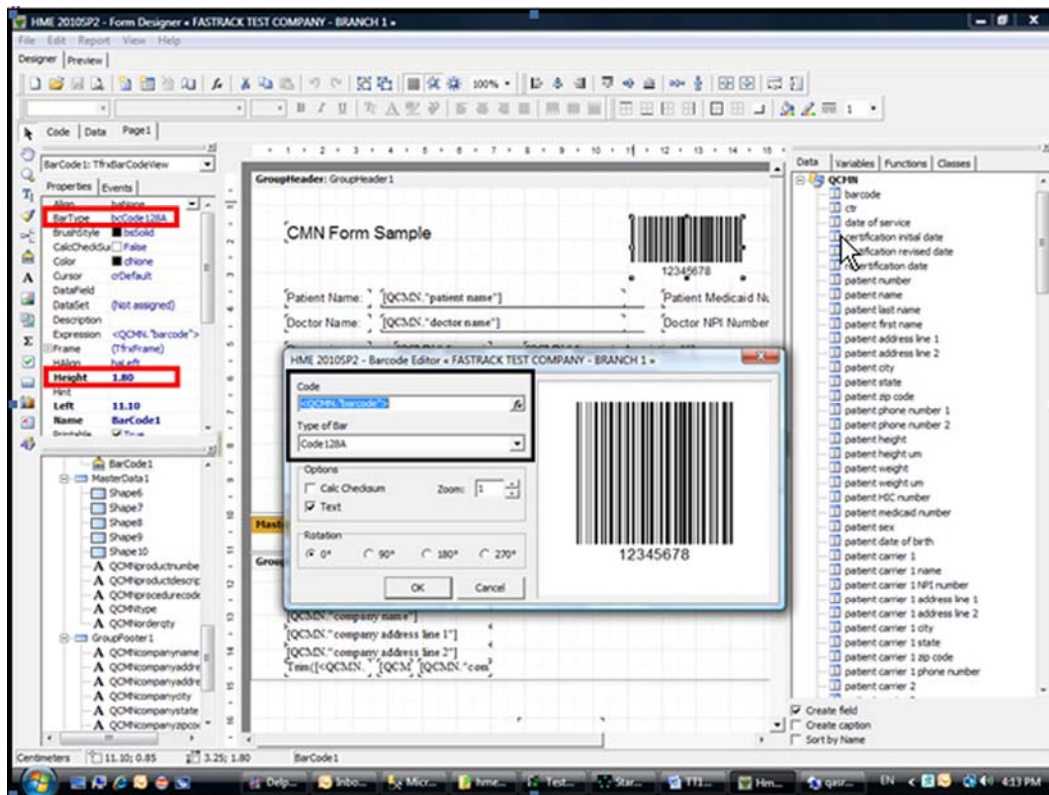

The System will also generate bar coded labels that can be attached to any document which is especially useful for correspondence from physicians, insurance companies, etc. Using bar codes Fastrack is able to take dissimilar document types and batch scan them into the system such that they are automatically inserted into the appropriate category. According to Spencer Kay, President of Fastrack, "This eliminates the time consuming process of having to individually tell the system where to locate each document. This new feature will dramatically improve productivity and aid in eliminating paper in the office."

The Fastrack Document Manager System can store virtually any type of document including; BMP, JPG, GIF, WORD, PDF and even WAV files from customer service calls. Documents can be stored in a specific patient, doctor, carrier, referral source, vendor, company, cash receipts and employee for quick retrieval.

The Fastrack Document Management System was originally developed in 2001 for the University of Michigan Health System and was the first to be fully integrated into an HME and Home Infusion Pharmacy System. The Document Management feature is available to Fastrack clients that license the software to run on their own server and for those that utilize the Fastrack Hosted Model by accessing the software through the Internet.

Fastrack is the leading supplier of software & technology to Home Medical Equipment providers, Durable Medical Equipment, Respiratory Providers, Home Infusion Pharmacies & Home Healthcare Agencies. Only Fastrack offers a solution for each individual segment of Home Care as well as one system encompassing virtually every clinical, operational and financial aspect of a provider's business, offering several or all of these product/service lines within one integrated Microsoft SQL database.
